

Appendix 2: *FIRST* Vex Challenge Award Guidelines

FIRST Vex Challenge *Create* Award Guidelines

| | Needs Improvement | Fair | Good | Excellent |
|-------------------|---|--|--|--|
| Structural Design | <ul style="list-style-type: none"> - Team has difficulty assembling robot & components during interview - Parts are used inefficiently | <ul style="list-style-type: none"> - Base structure has some stability - Modules/extremities are difficult to apply - Modules/extremities difficult to maintain - Robot unstable during motion - Difficulty with environmental variations | <ul style="list-style-type: none"> - Base and modules stable - Robot has some difficulty with variations | <ul style="list-style-type: none"> - Robot is modular and parts are used efficiently - Base and components very stable - Robot handles environmental variations very well - Robot displays a wide range of capabilities |
| Locomotion | <ul style="list-style-type: none"> - Robot has difficulty moving at all - Robot motion is jerky | <ul style="list-style-type: none"> - Robot motion is appropriate - Robot motion is not repeatable - Robot motion is not precise | <ul style="list-style-type: none"> - Robot motion is very appropriate - Robot motion is repeatable - Robot has minor difficulties with precision | <ul style="list-style-type: none"> - Robot drive train is extremely solid - All motions are appropriate for the tasks they do - Robot is very controllable - Robot actions are easily repeated |
| Manipulation | <ul style="list-style-type: none"> - Robot has one or no manipulators (attachments) - If there is one, it has extreme difficulty completing tasks | <ul style="list-style-type: none"> - Robot has 1 or more manipulators - Manipulators are not precise - Manipulator success is not repeatable | <ul style="list-style-type: none"> - Robot manipulators are capable - Some manipulators are unreliable - Some manipulators are overly complex | <ul style="list-style-type: none"> - Robot has 1 or more manipulators - Manipulators perform tasks extremely well - Manipulators are robust - Manipulators are simple - Manipulators are reliable - Team can install manipulators with ease |
| Overall Design | <ul style="list-style-type: none"> - Robot consists of a basic base design that lacks creativity and/or detailed explanation of how and why team came to that solution | <ul style="list-style-type: none"> - Robot is solid - Robot shows signs of team's design ideas - Sensors are not used to make the robot tolerant of variations | <ul style="list-style-type: none"> - Robot is solid (base and components) - Robot was designed by the team - Sensors are well-utilized - Manipulators don't reflect a consistent strategy - | <ul style="list-style-type: none"> - Robot is a complete system - Robot is consistent with team plan and strategy - All components work together - All components look like they belong together - Design is unique - Design demonstrates creative flair |

Appendix 2: *FIRST* Vex Challenge Award Guidelines

FIRST Vex Challenge Award Guidelines

| | Needs Improvement | Fair | Good | Excellent |
|---------------------------------|--|--|---|---|
| Roles & Responsibilities | <ul style="list-style-type: none"> - No clearly-defined roles on team - Not clear who completed which tasks - Very uneven distribution of work - Time management is poor or purely directed by the mentor | <ul style="list-style-type: none"> - Loose role assignments - Uneven work distribution - Time management skills are weak | <ul style="list-style-type: none"> - Clearly-defined roles - Team members understand each other's roles, but focus on their own - Work is distributed fairly - Team members will help each other, if asked - Team mentions learning time management | <ul style="list-style-type: none"> - Clearly defined roles - Team members understand each other's roles - Team members can fill each other's roles (happily!), if needed - Workload is distributed fairly - Team members assist each other without being asked - Team members give concrete examples of learning time management |
| Gracious Professionalism | <ul style="list-style-type: none"> - Team members show little/no respect for each other - Team members show no awareness of school/community issues - Team members compete with each other to be heard during judging - Team doesn't mention gracious professionalism | <ul style="list-style-type: none"> - Team members show limited respect for each other - Team members show limited awareness of school / community issues - Team talks about gracious professionalism, but gives no concrete examples of what they have done to help others | <ul style="list-style-type: none"> - Team members show respect for teammates - Team members imply increased awareness of school and/or community - Team members are vague about how this awareness translates into other aspects of their lives - Team implies that they have helped each other/other teams | <ul style="list-style-type: none"> - Team members give concrete examples of respect for teammates - Team members show increased awareness of their school/community - Team members clearly discuss how this increased awareness translates into other areas of their lives - Team members give concrete examples of how they have helped each other/others |
| Problem-Solving & Team Dynamics | <ul style="list-style-type: none"> - A problem was identified, but no steps were taken to identify a solution - One team member used power to reach their desired outcome - One person's ideas are used - Team members working against each other - Coercion and/or confrontation | <ul style="list-style-type: none"> - A problem was identified, but the chosen solution was inadequate to some team members - Some team members didn't accept the solution - Simple majority had input at meetings - Decisions made by simple majority - Coexistence is a dominant theme | <ul style="list-style-type: none"> - A problem was identified and there is compromise evident in the solution - Team tested various solutions to solve the problem - Cooperation is a dominant theme - Team focuses on individual tasks - Decisions made by most of the team | <ul style="list-style-type: none"> - A problem was identified and the team worked together to find a solution - Various solutions were tested and then incorporated - Team is willing to accept input - Collaboration and co-ownership are dominant themes - Team members show equality and value each other's roles - Group sees big picture and |

Appendix 2: *FIRST* Vex Challenge Award Guidelines

| | | | | |
|-------------------------|--|---|---|--|
| | dominate | | | <p>overall goals</p> <ul style="list-style-type: none"> - Members recognize interdependence - Decisions made by entire team |
| Confidence & Enthusiasm | <ul style="list-style-type: none"> - Only one team member spoke to the judge(s) - No/limited eye contact with judge(s) - Some team members seem disinterested | <ul style="list-style-type: none"> - About ½ the team spoke to the judge(s) - About ½ the team seems interested - Limited eye contact with judge(s) | <ul style="list-style-type: none"> - Everyone was ready to answer at least one question from the judge(s) - Most of the team appears excited and interested - Good eye contact with judge(s) | <ul style="list-style-type: none"> - All team members show confidence in themselves as well as the team - Members work together to include each other - Concrete examples of enthusiasm are shown - Team members show equal investment in FIRST Vex Challenge - All team members speak to the judge(s) - Good eye contact with judge(s) |
| FIRST Vex Values | <ul style="list-style-type: none"> - No clear enthusiasm for science, engineering or technology - Team doesn't mention new skills acquired - No mention of future aspirations | <ul style="list-style-type: none"> - Some members show an interest in science, engineering or technology - Limited attention paid to new skills acquired - Team members imply future aspirations | <ul style="list-style-type: none"> - Team shows a keen interest in subject matter, but limited use of concrete examples - Team implies new skills acquired - Team members suggest future aspirations - Team talks about how FLL has made a difference | <ul style="list-style-type: none"> - Group articulates a clear understanding of FIRST Vex Challenge - Team gives concrete examples of their interest in the subject areas - Team members give concrete examples of how they plan to continue in FLL, FRC or subject areas - Team talks about career aspirations - Team clearly talks about how FIRST Vex Challenge has made a difference for them |

Appendix 2: FIRST Vex Challenge Award Guidelines

FIRST Vex Challenge Think Award Guidelines

| | Needs Improvement | Fair | Good | Excellent |
|---|---|---|---|--|
| Engineering Design Notebook Format and Organization | <ul style="list-style-type: none"> - Did not follow format and/or guidelines found in the FIRST Vex Challenge manual - Overall organization of the Engineering Notebook is poor and impossible to follow the team's journey and robot design ideas - No pictures/drawings with no detail are found in the Engineering Notebook - Team biographies have little to no information about who they are and why they wanted to participate on the FIRST Vex Challenge team | <ul style="list-style-type: none"> - Followed few formatting elements and/or guidelines stated in the FIRST Vex Challenge Manual - Overall organization of the Engineering Notebook is poor and only some of the team's journey and robot design ideas are noted - Few pictures/drawing are with little to no detail are found in the Engineering Notebook - Team biographies have little information about who they are and why they wanted to participate on their FIRST Vex Challenge team | <ul style="list-style-type: none"> - Followed most formatting guidelines stated in the FIRST Vex Challenge manual - Overall organization of the Engineering Notebook is good and the team's journey and robot design ideas are defined - Some pictures/drawings with details that highlight only parts of the Engineering Notebook - Team biographies have some information about who they are and why they wanted to participate on their FIRST Vex Challenge Team | <ul style="list-style-type: none"> - Followed all formatting elements and/or guidelines stated in the FIRST Vex Challenge manual - Overall organization of the Engineering Notebook is excellent and the team's journey and robot design ideas are clearly defined and engaging - Pictures/drawings with details documenting all stages of robot design - Team Biographies have a lot of information about who they are and why they wanted to participate on the FIRST Vex Challenge team |
| The "Journey" and Engineering Design Process | <ul style="list-style-type: none"> - Team member ideas within the Engineering Notebook is not integrated - Engineering Notebook does not demonstrate an understanding of the engineering design process - Entries within the Engineering Notebook do not highlight the team's journey | <ul style="list-style-type: none"> - Team member ideas within Engineering Notebook is not well integrated - Engineering Notebook poorly demonstrates an understanding of the engineering design process - Few entries in the Engineering Notebook highlight the team's journey | <ul style="list-style-type: none"> - Team member ideas within Engineering Notebook is integrated - Engineering Notebook demonstrates an understanding of the engineering design process - Entries in the Engineering Notebook highlight the team's journey | <ul style="list-style-type: none"> - Team member ideas within Engineering Notebook is well integrated - Engineering Notebook demonstrates a clear understanding of the engineering design process and team actively used as a tool throughout the FVC season - Entries in the Engineering Notebook not only highlight the team's journey but offer insight to competition and design strategies |

Appendix 2: *FIRST* Vex Challenge Award Guidelines

| | | | | |
|--------------------------------|--|--|---|--|
| Team Awareness and Personality | <ul style="list-style-type: none"> - Engineering Notebooks Team Personality is not present - Problems were identified within Engineering Notebook but no steps were taken to identify a solution - Only one team member ideas are evident within the Engineering Notebook - Decisions made by one team member and/or mentor - Robot built by only one or two team members | <ul style="list-style-type: none"> - Engineering Notebook Team Personality is not clearly defined - A problem was identified within the Engineering Notebook, but the chosen solution was inadequate to some team members - Simple majority had input and is evident within the Engineering Notebook - Decisions made by simple majority without collaborative discussion - | <ul style="list-style-type: none"> - Engineering Notebook Team Personality is defined - A problem was identified within the Engineering Notebook and there is compromise evident in the solution - Cooperation is dominant theme - Decisions made by most of the team - Team focuses on individual tasks | <ul style="list-style-type: none"> - Engineering Notebook Team Personality is clearly defined - A problem was identified within the Engineering Notebook and the team worked together to find a solution - Collaboration and co-ownership are dominant themes - Decisions made by entire team - Team members show equality and value for each other roles |
